DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Michael S. Huppert on April 15, 2007.

Drawings

The following changes to the drawings have been approved by the examiner and agreed upon by applicant:

Corrected drawings (as "replacement sheets") must be submitted. The drawings filed on 1/16/2007 are non-compliant pursuant to 37 CFR 1.121

37 CFR 1.121 states:

(d) *Drawings*: One or more application drawings shall be amended in the following manner: changes to an application drawing must be compliance with § 1.84 and must be submitted on replacement sheet of drawings which shall be an to the amendment document and, in the top labeled "Replacement Sheet". Any replacement of drawings shall include all of the figures on the immediate prior version of the sheet, only one figure is amended. Any new sheet drawings containing an additional figure must be the top margin as "New Sheet". All changes drawings shall be explained, in detail, in drawing amendment or remarks section of amendment paper.

Art Unit: 1745

- (1) A marked-up copy of any amended drawing figure, including annotations indicating changes made, may be included. The marked-up must be clearly labeled as "Annotated" and must be presented in the amendment or remarks section that explains the change to the drawings.
- (2) A marked-up copy of any amended drawing figure, including annotations indicating changes made, must be provided when required by examiner.

In order to avoid abandonment of the application, applicant must make these above agreed upon drawing changes.

REASONS FOR ALLOWANCE

Claims 21-40 are allowed.

The invention of independent claim 20 recites:

A battery pack comprising:

a battery having a safety valve opening surface; a safety valve opening formed in said safety valve opening surface; a safety valve disposed in said safety valve opening; a molded resin region attached to said battery safety valve opening surface; and an insulating material disposed between said safety valve opening surface and said molded resin region so as to cover said safety valve opening,

Art Unit: 1745

wherein said insulating material includes a through hole located at a position that is separate from said safety valve opening, and said molded resin region is connected to said battery safety valve opening surface through said through hole.

The invention of independent claim 30 recites:

A battery pack comprising:

a battery having a safety valve opening surface; a safety valve opening formed in said safety valve opening surface; a safety valve disposed in said safety valve opening; a molded resin region secured to said battery safety valve opening surface; and an insulating material disposed between said safety valve opening surface and said molded resin region so as to cover said safety valve opening, wherein said insulating material includes a projection extending into said molded resin region, and said projection couples said insulating material and said molded resin region.

The prior art Iwaizono et al. (U.S. Patent No. 6,524,732 B1) does not teach or suggest a cell including all of the claimed features.

For these reasons, the claims are allowed over the prior art. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee.

Art Unit: 1745

Such submissions should be clearly labeled "comments on Statement of Reasons for Allowance."
